

Study Guide for 3 Types of Rocks Quiz

1. Igneous Rocks

Kinds of Igneous Rock

- Intrusive - Magma - Granite
- Extrusive - Lava - Basalt

2. Sedimentary Rocks

Steps to Form it:

1. erosion
2. deposition
3. compaction
4. cementation

Kinds of Sedimentary Rock

1. clastic
 - a. Conglomerate
 - b. breccia
2. organic
 - a. coal
 - b. limestone
3. chemical - salt

3. Metamorphic Rocks

A. Forces that form it:

1. pressure
- a. heat

B. Where does it form?

Deep beneath Earth's surface

C. Kinds of Metamorphic Rock - Example

1. Foliated - ex. slate
2. Nonfoliated - ex. marble
